Design Nature Acoustic

dukta[®]
flexible wood

produced by

dukta® - More flexibility with wood

With the dukta® design panel we offer an additional ecological product for indoor use, creating more value for eyes & ears. Dukta® panels provide a visual and audible advantage due to their ductility and transparency as in addition to the visually appealing appearance, dukta® panels are characterized by their sound-absorbing effect.

The dukta® panels are **wood-based panels incised on one or two sides**. The flexibility of the panels is achieved through a patented carving technique. The panels are particularly suitable for wall and ceiling applications, straight and curved surfaces, as well

as for freestanding partition elements and furniture.

The primary material is an MDF board, natural or black, multiplex beech or a spruce-three-layer panel. To expand the use and possibilities in interior design and shopfitting, we have most recently added panels with a digitally printed surface at: **dukta® PRINT**

All four dukta® incision types are suitable for printing:

LINAR

JANUS

SONAR

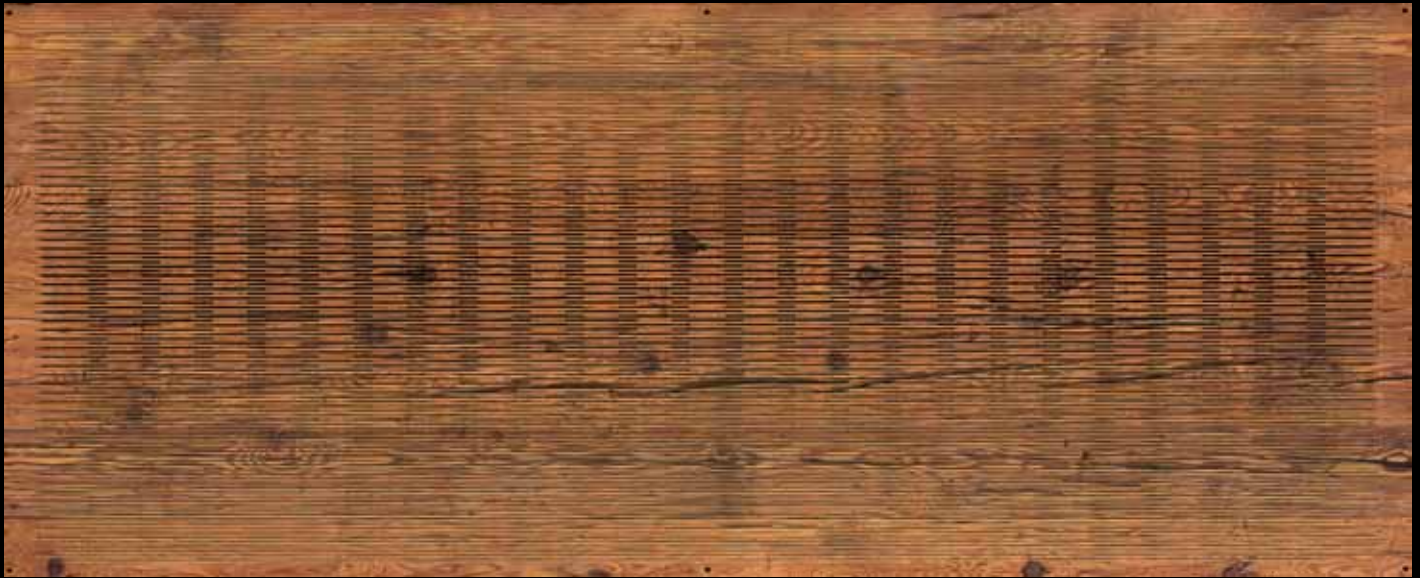

FOLI

flexible to use,
flexible in design

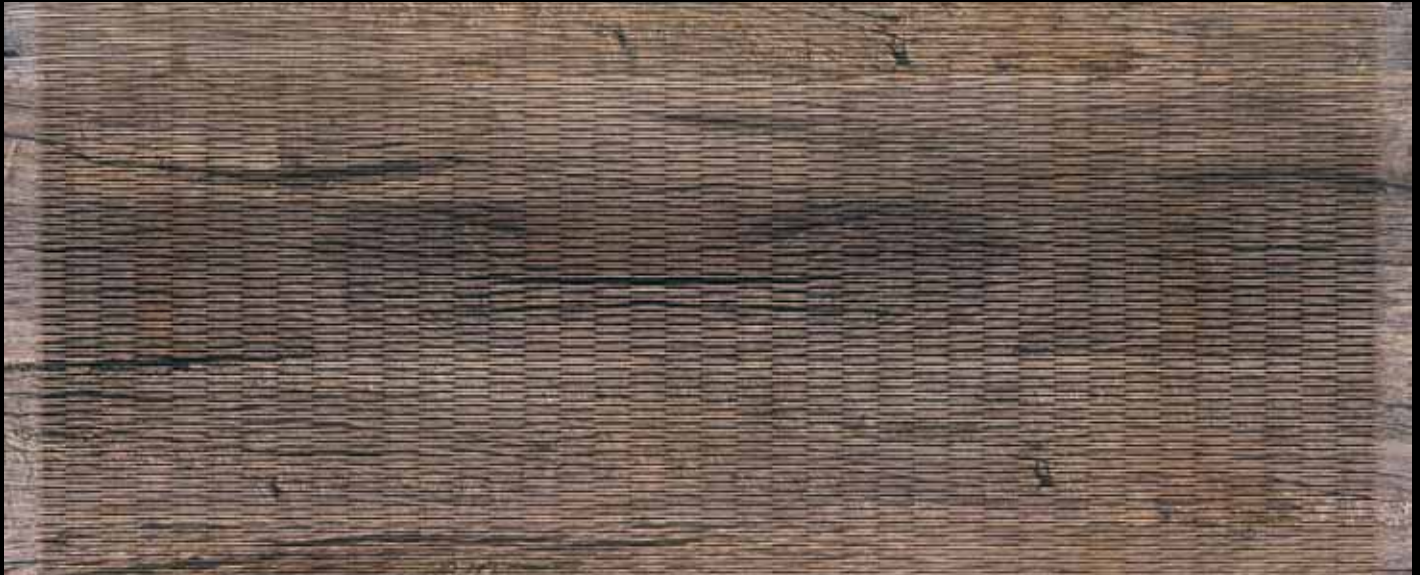

Design: Reclaimed Lumber Brown

dukta® JANUS, 3-layer panel in spruce raw, printed with the design „Reclaimed Lumber Brown“
Panel size: outer dimension 250x102cm, usable area 230x95cm

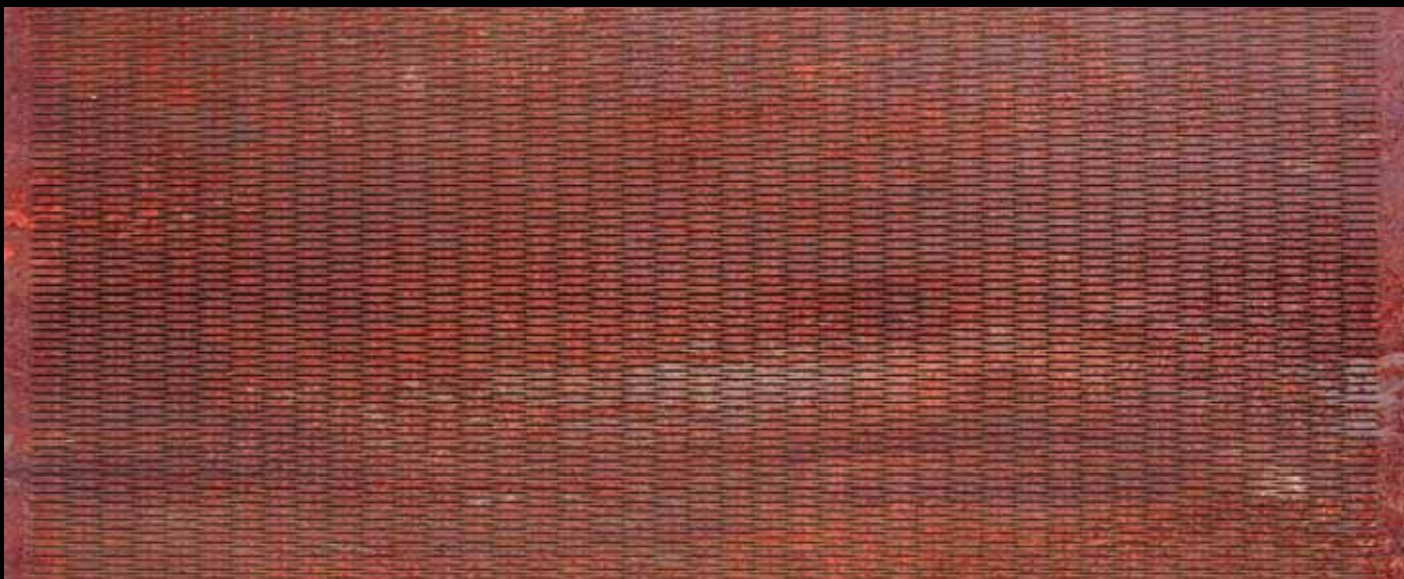

Design: Reclaimed Lumber Grey

dukta® LINAR, Multiplex Beech Raw, printed with the design „Reclaimed Lumber Grey“
Panel Size: outer dimension 250x125cm, usable surface 235x120cm

Design: Rusty Look

dukta® SONAR, mdf natural raw, printed with the design „Rusty Look“
Panel Size: outer dimension 250x125cm, usable area 230x120cm

Customized Printing

We also manufacture other designs, according to your wishes. Feel free to contact us!

Please note that the selected design may appear differently to the original image on the milled dukta® panels and can have colour differences.

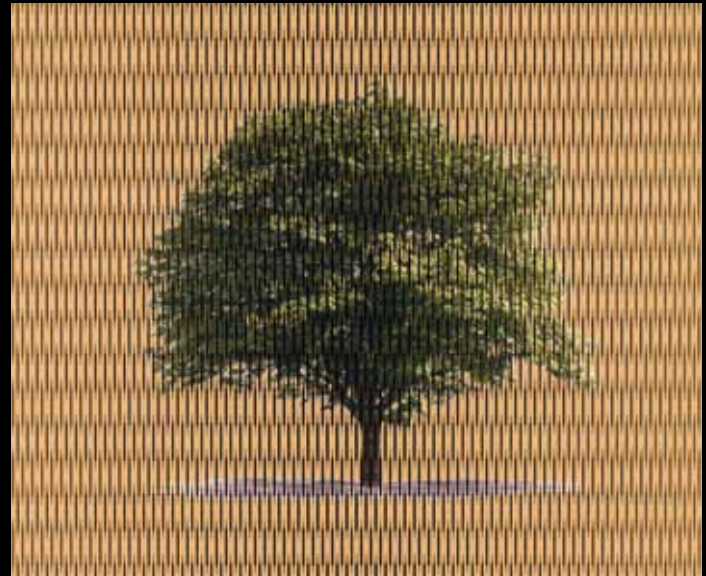

dukta® SONAR, mdf natural raw, printed with the design „Fruit Mix“
Panel Size: outer dimension 250x125cm, usable area 230x120cm

Customized Printing

We also manufacture other designs, according to your wishes. Feel free to contact us!

Please note that the selected design may appear differently to the original image on the shaped dukta® panels and can have colour differences.

dukta® SONAR, mdf natural raw, printed with the design „Tree“ (panel sector each ca. 70x60cm)
Panel Size: outer dimension 250x125cm, usable area 230x120cm

Only the best quality wood-based panels are processed.

Ideally suited for use in acoustically sensitive spaces such as recording studios, cinemas, concert halls or seminar rooms.

Diverse design possibilities in interior fittings for designers, carpenters, furniture manufacturers and much more.

General information about dukta® PRINT:

dukta® PRINT is available starting at 5 panels per design. Select one of our standard designs or send us your idea for an individual print.

We provide information on price and delivery time based on your request.

Samples and advertising material are available.

Unprinted panels can be delivered in small quantities quickly and directly from our stock.
